## Hand Nozzles

With innovative safety features and impressive research and development, POK has manufactured a wide range of hand nozzles that is sure to fit your needs.

- Automatic pressure regulation
- Dual pressure (operating at 3 or 6 bar)
- Fixed flow rate
- Selectable flow rate
- Selectable stream patterns (Straight jet, flashover, and wide angle spray)
- Choice of zero, one or two pistol grips
- Customizable color options
- Material ranges from aluminum, bronze and stainless steel

## Monitors

POK's state of the art monitors (also known as water cannons) are designed and manufactured with the best materials available. Whatever the application, POK has a solution.

- Portable / fixed monitors
- Motorized with remote control systems
- Outlet diameter ranging from 1.5" to 16"
- Flow rates ranging from 500 to 40,000 lpm
- With shutoff / without shutoff
- Horizontal and vertical movement range options
- Material ranges from aluminum, bronze and stainless steel
- A wide range of outlet equipment (diffusers/branchpipes)

## Foam Equipment

Compatible with most foam concentrates, POK manufactures eductors according to the Venturi principle. Our range of eductors are available with various flow rates, and a range of connections.

- Easy to use dosage with calibrated orifices (.4%, 1%, 3% or 6%)
- Flow rates from 35 to 10,000 lpm
- With bypass / without bypass
- Material ranges from aluminum, bronze and stainless steel
- Connections include a large range of foam branchpipes from low, medium, to high and dual expansion
- Portable & mobile units, nozzles, foam generators and foam chambers also included in the range

## Dividers

POK's range of dividers has been designed to generate the least amount of pressure loss possible and offer several combinations.

- 2, 3, 4 and 5-way dividers
- Ball valve, flywheel control or without shutoff
- Optional carrying handle
- Optional pressure gauge
- Can be adapted to a large range of couplings

## Hose Reels

POK's hose reels are designed to provide an immediate and continuous water flow. Whether the reels are wall-mountable, swinging, rotating, or fixed, POK offers choices.

- With hose / without hose
- With diffuser / without diffuser
- With shutoff / without shutoff
- Rotating, swinging options made to rotate 180°
- Fixed, swinging options made for narrow places
- Manual hose reels with wheel or crank options
- Motorized hose reels with water supply (for fire vehicles)
- Optional control kit and mounting support
- Material ranges from steel, aluminum, or stainless steel

## Couplings

All POK couplings are manufactured to be compliant with international norms. We offer a wide range of couplings, accessories, adaptors, gaskets, spanner wrenches and operation tools.

- Barcelona
- BSP
- BSRT / BS336
- DSP and AR symmetric
- GOST
- Guillemin symmetric
- Machino
- NST-NH
- QC
- Storz (including Beijing, Greek and NEN Storz)

## Strainers

POK manufactures a wide range of strainers to fit your needs.

- Drain system / without drain system
- With non return valve / without non return valve
- Barrel material ranges from aluminium and polyethylene
- Accessories include carrying handle, hamper and floating device

## Additional Products

Please see our catalog for a complete list of products. POK manufactures a wide range of products that are not listed above. Here are other products we offer:

- |                     |   |
|---------------------|---|
| ➤ Accessories       | ➤ Hoses   |
| ➤ Caps and gaskets  | ➤ Outlet equipment for monitors                                     |
| ➤ Control equipment | ➤ Pumps, fans, motors   |
| ➤ Elbows and valves | ➤ Towable Trailers (with remote controlled monitors, or foam units) |
| ➤ Foam stations     |   |

# About POK

Founded in 1976 by Bruno Grandpierre, POK is a global manufacturer of high quality firefighting equipment for the following industries:

- › Fire & Rescue Services
- › Oil & Gas
- › Army, Navy & Air Force
- › Chemical & Pharmaceutical
- › Power Generation & Aerospace
- › Factories, Commercial Space & Airports
- › Road Transport

POK uses the finest materials available and state of the art CNC machines. Our product range is over 3,600 and POK is ISO: 9001 and ISO:14001 certified. Our moral commitment to the firefighters and community who depend on our products motivates our creativity and unparalleled technical excellence.

## Services

- › Product innovation through an on-site Research & Development
- › Customized solutions with on-site Mechanical & Electrical Engineering
- › Manufacturing expertise – keeping production costs low by reducing waste
- › Exceptional customer service & after sales support who speak many languages

## Location

POK is a family run business and located in the beautiful village of Nogent-Sur-Seine, France, and conveniently located about an hour east of Paris.
